JNA

PROJECTS

About Us:

JNA PROJECTS started in 1996 in the Western Cape. Being part of the larger property and construction driven JNA Group, our directors identified the need for a practical, solution driven building contractor.

Our hands-on proactive approach, together with excellent service and outstanding quality, initiated our growth to being a fully-fledged construction company, serving both the residential and commercial markets in the Western and Eastern Cape. Our outstanding client service, attention to detail and successful delivering of projects is a testimony to how we have become the established company we are today.

We specialise in the construction of upmarket homes, office buildings, hotels and shopping centres, as well as alterations, restorations and renovations of existing properties. Having our offices in Cape Town and George, allows us to complete projects in both the greater Western and Eastern Cape regions. With our proven track record and vast experience, we are capable of undertaking a wide sphere of projects.

Being affiliated with both the Master Builders Association and the National Home Builders Registration Council, our clients can rest assured that they are receiving professional workmanship.

Vision:

We strive to create a superior quality of life for our staff and clients by the creative utilization of resources.

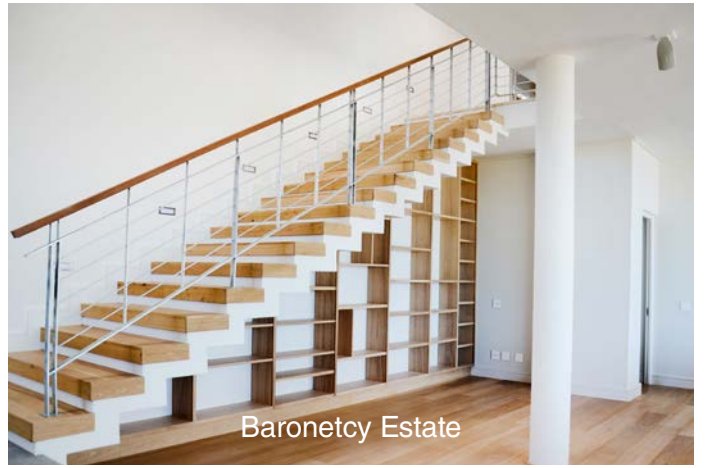

People and the Environment:

Our mission is to achieve and maintain the highest level of safety, health and environmental control in all areas of the company's operations. Innovative training and education programmes allow us to provide our teams with the tools they need to increase safety and manage risk. These principles are applied in every project we manage; ensuring not only the well-being of our employees but continuously establishing ourselves as compliant to all legal requirements.

Services:

At JNA Projects we pride ourselves in being more than just a building contractor. We continuously strive for sustainability far beyond statutory requirements. Backed by our significant resources, JNA Projects is well-placed to effectively tackle projects on both a negotiated or a competitive tender basis.

Apart from being a leading building contractor, our services include the following:

- Conceptual Design
- Preliminary Cost Advice
- Project Feasibility and Viability Studies
- Cost Planning and Budget Establishment
- In-House Professional Engineering Services
- Project Management
- Construction Management
